

AMERICA/MEXICO - General health care and food counseling organized by the local Church

Tijuana - The Archdiocese of Tijuana, the main city of the Mexican state of Baja California, organized the Fifth Day of Health care in the Miramar colony where free counseling services were offered regarding general medical care, nutrition and dentistry. In a statement sent to Fides Agency, the local responsible for the health care pastoral, said that the Church in addition to taking care of the spiritual aspect, is also concerned about the overall well-being of the community and, together with other humanitarian groups in the United States and Mexico, carry out medical days in the colonies and in the most vulnerable communities in Tijuana every day. During this Fifth Day the main goal was to make people aware of taking care of their health. (AP) (Agenzia Fides 20/09/2013)
