

## **AFRICA/SOUTH SUDAN - "Our place is here": caring for mothers and infants in need of medical attention**

Yirol (Agenzia Fides) – War is making it ever more difficult to help mothers and infants in need. Caring for the most vulnerable is the constant commitment of Medici Africa Cuamm in the martyred land of South Sudan. The first hospital was opened here in 2006 in Yirol and then a second hospital at Lui. Today more than ever after the explosion of tension between loyalist troops and rebels, the priority for intervention remain hospital service and assistance to people forced from their homes, the displaced. In the field, despite the scarcity of means, medical doctors and volunteers seek to meet the emergency offering the local people a clear sign of closeness and sharing.
